

# What is Contentstack Marketplace?

The [Contentstack Marketplace](#) is a platform for apps and other resources that help you extend the capabilities of our core CMS and customize its functionalities. It is a one-stop resource to discover, browse, and install tools to enhance the Contentstack experience by connecting to various third-party services in a simple installation. The [apps](#) and resources on Marketplace are created by Contentstack and our partners.

Contentstack Marketplace is Contentstack's very own app distribution platform similar to the App Store in Apple, or the Play Store in Android. You can use and install apps from our Marketplace to extend the existing capabilities of your Contentstack web application.

Marketplace Apps allow you to extend the capability of our core CMS and customize its functionalities. With these ready-to-use apps, you can integrate your favorite third-party platforms easily and with minimal effort. These pre-built apps are intended to be quickly and easily installed. Apps like this are built to solve a

particular problem, help integrate with a specific software, or provide functionality for a user of Contentstack.
